

New Parts

New Thinking

Why settle for a rebuilt magneto, when you can have a new, factory warranted, inside and out, Slick Magneto from Unison for much less? Unison's Slick rebate program is the best in the industry. You get a new magneto for less than a questionable rebuild. And, Unison employs the latest in piston engine ignition technology when building its popular Slick Magnetos and Harnesses to ensure you get maximum performance from your engine every time you fly.

Applications

Slick Magnetos and Harnesses are FAA-PMA and OEM Approved on more engines than any other manufacturer, including new production engines by Textron Lycoming, Teledyne Continental Motors (TCM) and many other OEMs, as well as remanufactured and overhauled engines. For complete application data, including specific engine models, please refer to Unison's F-1100 Slick Master Service Manual and L-1318 Consolidated Application Data.

Program Details

- q Return competitive magneto cores and harnesses to the distributor where Slick units were purchased. Magnetos must be complete and in "as removed" condition.
- q Unison reserves the right to reject incomplete magneto cores.
- q Slick distributors will return cores to Unison for rebate processing, and all core credits will be issued by your authorized Slick distributor.
- q All rebate checks are issued to the party named on the rebate core tag.

Replace These Products With Slick Products	Cash Rebate	+	Core Credit	=	Retail Value
Two TCM/Bendix or other cooepetitive magnetos and any harness	\$150.00		\$300.00		\$450.00
One TCM/Bendix or other competitive magnetos	\$30.00		\$150.00		\$180.00
One TCM/Bendix, Champion, or other competitive harness	\$35.00		N/A		\$35.00

All rebates are subject to invoice and core verification. Slick ignition system upgrade kits containing two magnetos, a complete harness and mounting hardware are available at a significant discount to buying the components separately.
